Name _____

Class _____

Measurement

I can solve problems involving the calculation and conversion of units of measure, using decimal notation up to three places if I need to. 

I can use, read, write and convert between standard units. I can convert measurement of length, mass, volume and time from a smaller unit to a larger unit and vice versa. I can do this using decimal notation up to the three decimal places. 

I can convert between miles and kilometres. 

I can recognise that shapes with the same areas can have different perimeters and vice versa. 

I can recognise when it is possible to use formulae to find the areas or volumes of shapes. 

I can calculate the areas of parallelograms and triangles. 

I can calculate, estimate and compare volumes of cubes and cuboids using standard units, including cubic centimetres (cm^3), and cubic metres (m^3). I can extend this to other units e.g. mm^3 and km^3 . 

Properties of Shape

I can draw 2-D shapes using dimensions and angles I am given. 

I can recognise, describe and build simple 3-D shapes, including making nets. 

I can compare and classify geometric shapes based on their properties and sizes. I can also find unknown angles in any triangles, quadrilaterals or regular polygons. 

I can illustrate and name parts of circles, including radius, diameter and circumference. I know that the diameter is twice the radius. 

I can recognise angles where they meet at a point, are on a straight line or are vertically opposite. I can then find any missing angles. 

Position & Direction

I can describe positions in all four quadrants on a full coordinate graph. 

I can draw and translate simple shapes on the coordinate plane and reflect these in the axis. 

Statistics

I can interpret and construct pie charts and line graphs. I can use these to solve problems. 

I can calculate and interpret the mean as an average. 

Ratio & Proportion

I can solve problems that involve the relative sizes of two things where the missing number can be found by multiplying or dividing by whole numbers. 

I can solve problems involving the calculation of percentages. I can also use percentages for comparisons. 

I can solve problems involving shapes where the scale factor is known or can be found. 

I can solve problems involving unequal sharing and grouping. I can use my knowledge of fractions and multiples to do this. 

Algebra

I can use simple formulae. 

I can create and describe linear number sequences. 

I can record missing number problems algebraically. 

I can find pairs of numbers which complete an equation with two unknowns. 

I can create a list of possibilities of the combination of two variables.
